INTRODUCTION

The **Reference Index** is a collection of all permanent, active Copyrights and Trademarks contained in the CIS. It does not contain Patents. This Reference Index is divided into two sections, a KWIC and Numerical Index. The KWIC (Key-Word-In-Context) Index and the Numerical Index are provided to help you use the Customs Issuance System (CIS). This Reference Index is updated every six months and is distributed to all system users.

Key-Word-In-Context (KWIC) Index-

Provides a listing of issuances by alphabetical order utilizing key words as a reference guide. In general, the index enables you to do three things related to issuance records in the CIS:

1. **Determine if** an issuance exists on a particular subject;

2. Identify the **location** of the issuance; and

3. Indicate whether an issuance has previously been **superseded** or **rescinded.**

Numerical Index-

Contains a listing of issuances by type of issuance. Other information listed in the Numerical Index includes issuance number, date of issuance, originating office symbol and distribution code.

KWIC INDEX
